

**Aiming high Fun Day**  
Saturday 31<sup>st</sup> July 2010 – Auriol School

**Participation Event**

Q=How children and young people want to receive information and at what age they would like to receive it???

Children and young people were asked to design a mini person (paper person) and then stick on pictures of how they want to receive information. The topics to choose from were:

- Writing
- Facebook
- Bebo
- Computer
- E-mail
- Telephone Call
- Text
- DVD
- Group Work
- Face to Face

Once this had been completed, children and young people had to place the mini me on the time line at what age they wanted to receive information. The information could be about school, careers, housing, money, relationships, and transition.

Attached to this is a pie chart showing the responses of 10 children who took part? You will see that e-mail received the biggest response closely followed by face to face then computer and text. This event is going to be carried out within schools and other groups to gather further data. The bar graph shows at what age children and young people want to receive information.

Thank you to all those who took part and I hope you enjoyed the  
**FUN DAY**

For information about participation and how disabled children and young people can help influence future services. Please call Gareth, Disability's Participation Worker on 01372 844773 or 07960 319 657
