

Aiming High for Disabled Children, Surrey (AHDC Surrey)

Children and Young People's Short Breaks Questionnaire 2009

North East Surrey Graphs

Date: 30th September 2009

Written By: Justine Loggenberg

About the activity:

The purpose of the Children and Young People's Short Breaks Questionnaire 2009 was to gather information from children and young people regarding the types of short break activities they would like; and to then distribute the findings to existing and potential providers to inform their planning.

In total, 17 settings agreed take part. Of the 453 children and young people who were approached, 237 children took part. At three of the settings the staff of those settings carried out questionnaires. Justine Loggenberg of the AHDC team and/or Stephanie Anderson of the Children's Fund team visited the remaining 14 settings.

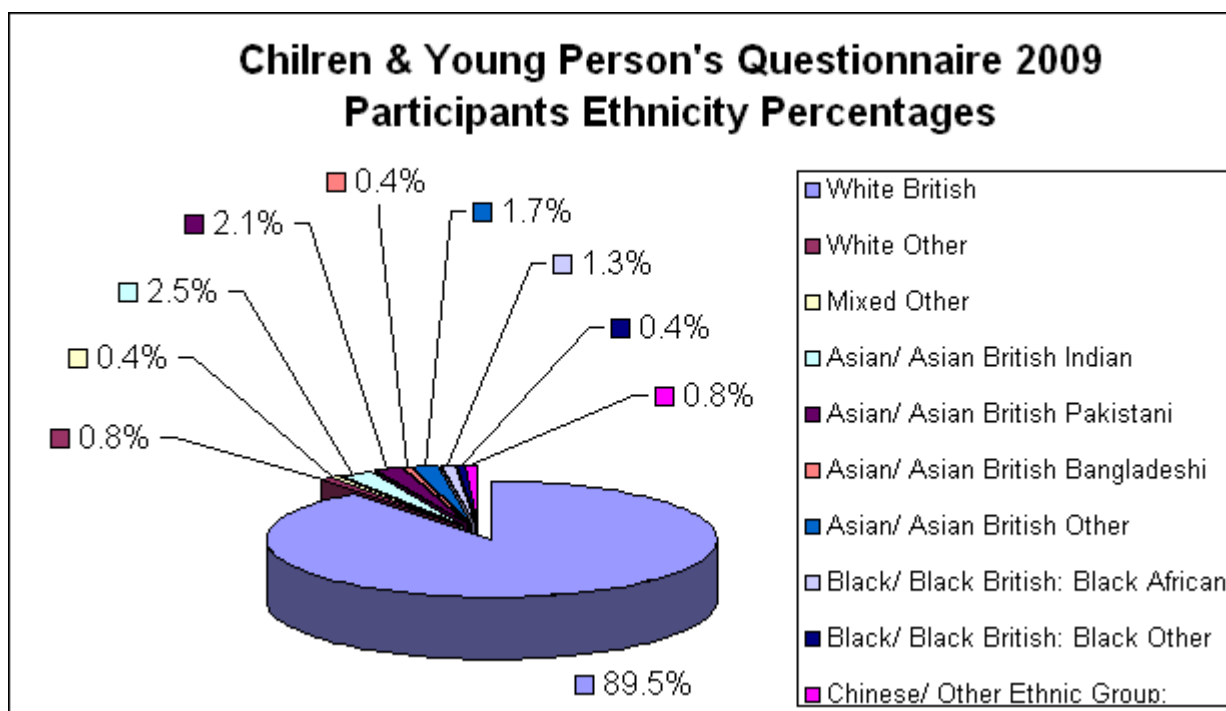

Children and young people conveyed their preferences about sports, activities and outings via one or more of the following methods:

- conversation/ discussion
- drawing pictures
- making collages
- completing questionnaires
- using talking mats
- eye pointing

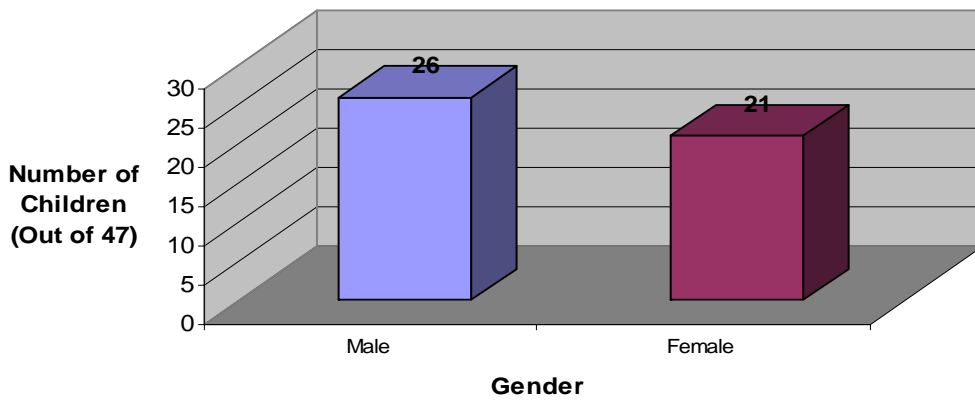

The information recorded about each child or young person included their age, primary disability, gender, ethnicity and the area of Surrey in which they took part. No information that could be used to identify an individual was recorded.

From North East Surrey, 47 children and young people gave us their views. They came from:

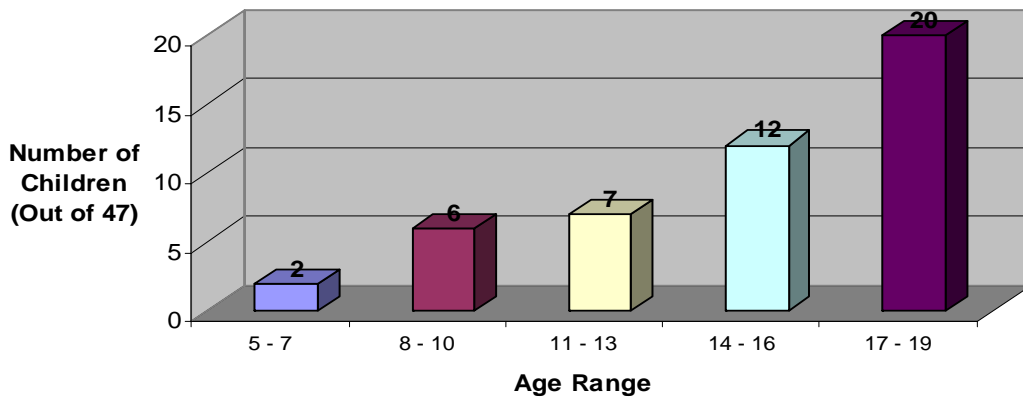

- National Autistic Society: After School Club: Walton on Thames
- Spelthorne Millennium After School Club
- Walton Leigh School
